QUESTION: Reporting

How can we improve?

Identify the specific type of modern slavery risks if possible (such as forced labor, child labor, debt bondage, deceptive recruitment practices, etc), where it occurs in your operations and value chain, what its relevant indicators are (such as loss of freedom of movement, failure to check worker age, payment of recruitment fees, or complaints about contract substitution, etc), and whether you cause, contribute or are directly linked to the risk.

Prioritize the salient risks in your modern slavery risks for attention based on severity and likelihood:

- Assess the severity of the impact on the people affected, considering how grave the impact would be, how widespread (i.e., how many people would it affect) and how hard it would be to remediate the resulting harm; and,
- Consider the likelihood of risk occurring (noting that the most severe risks should be prioritised even if there is a low likelihood of occurring).
